February 18, 2018

Dear IEX Group,

I am applying for the Summer 2018 internship position. I'm excited to connect with a company that reaches into the area between data science and trading- it's always been a topic that interested me. I'm a Computer Science major with a specialization in Systems Software Development. This summer, I will be a rising senior.

At my previous internship at Van Andel Institute, I worked in a department that overlapped technology, business administration, and science/academia. The educational opportunities were inspiring, and I'm happy to have worked on a visualization project that impacted the researchers and helped make decisions. Other relevant experience I have includes being a Teaching Assistant for our Analysis of Algorithms course. During my time as a TA, I had many chances to learn new ways to teach students about concepts like dynamic programming, backtracking, and graph algorithms. I look forward to opportunities at IEX to find new problems to tackle.

I would love to get in touch; my email is calvin.li@stonybrook.edu and my cell phone number is (631) 624-6202. Hope to hear back soon!

All the best,

Calvin Li
